ABOUT ME

Full-Stack Developer specializing in React and Node.js with 3 years of experience building production-ready digital products for commercial businesses. I have led the development of multi-branch e-commerce platforms, corporate web portals, and mobile applications, integrating external APIs, user authentication, and performance optimization. I am characterized by critical thinking, adaptability, and a continuous improvement mindset. Written English B2. Immediately available for remote work — Spain, Mexico, Argentina, LATAM, and the U.S.

PORTFOLIO: + GitHub + LinkedIn

PROFESSIONAL EXPERIENCE

Development Analyst

Grupo La Mundial — Maracaibo, Venezuela · Mar 2023 – Aug 2024

Led the development of multiple digital products for the business group — from e-commerce to corporate portals and mobile applications — coordinating design, development, and production deployment for each deliverable.

- Built a full-stack e-commerce platform for Ruedas La Mundial (React + Node.js + MySQL) integrating 6 branches with real-time inventory management, complete checkout flow, and order confirmation email notifications.
- Implemented a loyalty token system integrated into the e-commerce, allowing users to accumulate redeemable points for automotive services.
- Developed 11 individual landing pages for international brands: Hankook, Dunlop, Chengshan, Nankang, Prinx, Gulf, Yokohama, WeatherTech, and Valvoline — for Cauchos, Baterías, and Lubricantes La Mundial.
- Optimized 2–3 high-load-time websites using lazy loading and image compression, significantly reducing response times.
- Built a job portal with application tracking: candidates can apply to active vacancies, receive status updates (accepted/rejected), and administrators manage the full recruitment flow.
- Developed a mobile app (React Native + TypeScript + MongoDB) for automotive service subscriptions at Ruedas La Mundial — reached testing phase with 20% of functionality implemented.

React Developer — Freelance

Independent Projects · Aug 2024 – Mar 2025

Worked independently developing full-stack projects for various clients, managing everything from requirements gathering to final deployment.

- Delivered more than 6 complete full-stack projects using React, Next.js, Node.js, and MySQL, each with external API integration, user authentication, and responsive design.
- Redesigned and migrated the Yokohama site to Next.js + Tailwind CSS, improving performance, SEO, and code structure over the previous production version.
- Optimized existing high-load-time applications through code refactoring and caching strategies, achieving measurable improvements in response times.
- Delivered React JS, Next.js, and Tailwind websites, as well as full-stack web applications with Node.js and MySQL, across short- and medium-term projects.

IT Support

FERREMECA — Maracaibo, Venezuela · Mar 2025 – Present

- Technical assistance and incident resolution related to company equipment and systems.
- Preventive and corrective maintenance of hardware and software, ensuring operational continuity.
- Technology performance optimization to ensure the efficiency of internal processes.

Development Intern

Poliolefinas Internacionales de Venezuela C.A. · Feb 2022 – Aug 2022

- Level 1 and 2 technical support to users remotely and on-site — servicing, repairing, and replacing equipment.
- Developed an internal web application with Python + MySQL for managing the company's operational processes.
- Implemented a chatbot for automated updates to the corporate Intranet page.

FEATURED PROJECTS

E-Commerce — Ruedas La Mundial

React · Node.js · MySQL · REST API

Online sales platform unifying 6 physical branches. Includes a product catalog with real-time branch-level availability (available / in stock / out of stock), a loyalty token system with purchase-based accumulation, a complete checkout flow, and automatic email notifications upon order confirmation.

Job Portal — Grupo La Mundial

React · Node.js · MySQL

Vacancy and application management system for the business group's HR unit. Candidates view active vacancies, apply, and receive application status tracking. Administrators manage the full recruitment pipeline from a control panel.

11 International Brand Websites

React JS · Next.js · Tailwind CSS · Bootstrap · FontAwesome

Individual development of landing pages for multinational brands: Hankook, Dunlop, Chengshan, Nankang, Prinx, Gulf, Yokohama, WeatherTech, and Valvoline — across Cauchos La Mundial, Baterías La Mundial, and Lubricantes La Mundial. Each site adapted to the brand's visual identity with performance and image optimization.

Subscription Mobile App — Ruedas La Mundial

React Native · TypeScript · Node.js · MongoDB · Expo

Mobile application for automotive service subscriptions. Users accumulate tokens per purchase made through the e-commerce platform and redeem them for services at the store network. Reached testing phase with 20% of functionality implemented.

Intranet Chatbot — Poliolefinas Internacionales

Python · MySQL

Chatbot implementation for automated updates to the corporate Intranet page of Poliolefinas Internacionales de Venezuela C.A., complemented by an internal web application for operational process management.
